

Tip 48 Connect line to a reel spool

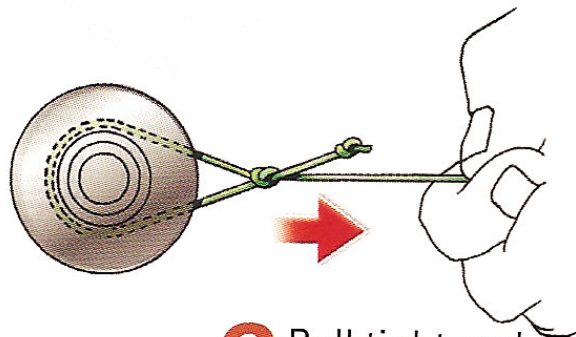

There are many ways to attach line to a spool, but here is the way most pros do it. It's called the Arbor Knot:

1 Pass line around reel spool (arbor).

2 Tie an overhand knot around the standing line. Then tie a second overhand knot in the tag end.

3 Pull tight and snip off excess. Snug down first overhand knot on the reel arbor.
